EXP.NO:	3	AWK SCRIPT PROGRAMMING
DATE:		

AIM

To learn AWK scripting for text processing — including reading columns, arithmetic, conditions, and generating reports from data files.

PROCEDURE

1. Create a data file (employee.txt) with employee records.
2. Write AWK commands and scripts to process the file.
3. Execute and verify the output.

DATA FILE – employee.txt

```
101 Ravi    HR      55000 25
102 Priya   IT      72000 28
103 Arun    Finance 48000 22
104 Sneha   IT      81000 30
105 Karan   HR      63000 27
```

PROGRAM 1 – Print Name and Salary

```
awk '{print $2, $4}' employee.txt
```

PROGRAM 2 – Total and Average Salary

```
awk '
BEGIN { total=0; count=0 }
{
    total += $4
    count++
}
END {
    print "Total Salary  =", total
    print "Average Salary =", total/count
}' employee.txt
```

PROGRAM 3 – Conditional Filter (Salary > 60000)

```
awk '{
    if ($4 > 60000)
        print $2, "earns", $4
}' employee.txt
```

PROGRAM 4 – AWK Script File

```
# File: report.awk
BEGIN {
    print "---------- Employee Report ----------"
    print "ID   Name    Dept    Salary  Age"
    total = 0
}
{
    print $1, $2, $3, $4, $5
    total += $4
}
END {
    print "-------------------------------------"
    print "Total Salary =", total
}
```

OUTPUT

```
$ awk '{print $2, $4}' employee.txt
Ravi 55000
Priya 72000
Arun 48000
Sneha 81000
Karan 63000

$ awk 'BEGIN{total=0;count=0} {total+=$4;count++} END{print "Total:",total; print
"Avg:",total/count}' employee.txt
Total: 319000
Avg: 63800

$ awk '{if($4>60000) print $2,"earns",$4}' employee.txt
Priya earns 72000
Sneha earns 81000
Karan earns 63000

$ awk -f report.awk employee.txt
---------- Employee Report ----------
ID   Name    Dept    Salary  Age
101 Ravi HR 55000 25
102 Priya IT 72000 28
103 Arun Finance 48000 22
104 Sneha IT 81000 30
105 Karan HR 63000 27
-------------------------------------
Total Salary = 319000
```

RESULT

AWK scripting was successfully implemented for text processing, arithmetic operations, conditional filtering, and report generation from employee data files.
