EXP.NO:	2	VI TEXT EDITOR AND NANO
DATE:		

AIM

To learn and practice the VI text editor and Nano editor in Linux for creating, editing, and saving files.

PROCEDURE

1. Open terminal and type 'vi filename.txt' to open VI editor.
2. Press 'i' to enter Insert Mode, type text, then press Esc.
3. Use ':wq!' to save and quit or ':q!' to quit without saving.
4. For Nano: type 'nano filename.txt', edit, then press Ctrl+X to exit.

VI EDITOR – KEY COMMANDS

Command	Action
vi filename	Open file in VI editor
Esc + i	Switch to Insert Mode
Esc + :wq!	Save and quit
Esc + :q!	Quit without saving
Esc + :set nu	Show line numbers
Esc + dd	Delete current line
Esc + /pattern	Search for pattern
Esc + :%s/old/new/g	Find and replace globally
Esc + :5	Go to line 5
nano filename	Open file in Nano editor
Ctrl + X	Exit Nano
Ctrl + O	Save in Nano
Ctrl + W	Search in Nano

PROGRAM – Sample Script Edited Using VI

```
#!/bin/bash
# Script created using VI editor
echo "Enter your name:"
read name
echo "Hello, $name! Welcome to Linux Lab."
echo "Today's date is: $(date)"
```

OUTPUT

```
$ vi hello.sh
[VI Editor opens - Insert mode used to type the script]
[Esc :wq! used to save and quit]

$ chmod +x hello.sh
$ ./hello.sh
Enter your name:
Arun
Hello, Arun! Welcome to Linux Lab.
Today's date is: Mon Apr 10 09:30:00 IST 2025
```

```
$ nano sample.txt
[Nano opens - text typed, Ctrl+O to save, Ctrl+X to exit]

$ cat sample.txt
This file was created and edited using Nano editor.
```

RESULT

The VI and Nano text editors were successfully used to create, edit, and save files. All key commands were practiced and verified.
